

THE
LUNG
LAB

WE'RE ALL DIFFERENT

Can you imagine a rainbow that was only one colour?

Sounds boring, doesn't it?

Rainbows are beautiful because of all their different colours. People are exactly the same - all beautiful, but all different colours, shapes and sizes.

We're all different inside too - that's why some kids have asthma. Life would be boring if we were all the same!

Write down six differences between you and the person you sit next to in class.

For example:

Lisa has got brown eyes. My eyes are blue.

or

Bobby has short hair. My hair is long.
